EDUCATION

The University of Hong Kong (HKU)   Hong Kong, China
Ph.D. in Computer Science   2020–2024 (Expected)

- HKU-SUSTech Joint PhD Program. Supervisors: Reynold Cheng (HKU), Bo Tang (SUSTech)
- Research Interests: Recommender System, Graph Neural Networks.

Southern University of Science and Technology (SUSTech)   Shenzhen, China
B.Eng. in Computer Science, GPA: 3.73/4.00   2016–2020

- Thesis: "Public Transportation Scheduling Evaluation: A Data-Driven Approach"

INTERNSHIP

TCL Corporate Research(HK) Co., Ltd   Hong Kong, China
Research Intern   Jun. - Aug., 2021

- Proposed an automatic effective meta-path searching framework for existing meta-path-based recommenders.
- Proposed a GNN-based method for recommendation by using meta-paths.

Huawei Technologies Co., Ltd.   Dongguan, China
Site Reliability Engineer Intern   Jul. - Aug., 2019

- Mainly engaged in monitoring system development. Implemented a load anomaly alert and email notification system.
- Completed 17 instructing documents, 3 demo (database migration tool, monitoring interface customization, key data query and alarm service) and 5 improvement suggestions.

RESEARCH PROJECTS

- **Multi-domain Recommendation with Domain Disentangling and Alignment** (Mar 2022 - Oct 2022)

  - **This work was submitted to TheWebConf (WWW) 2023.**
  - Propose an embedding disentangling architecture for multi-domain recommendation, which explicitly disentangles inter-domain and intra-domain knowledge at the embedding level.
  - Formulate a random walk-based domain alignment strategy to identify similar users/items from different domains, which helps to share knowledge and avoid over-fitting.

- **Automatic Meta-Path Discovery for Effective Graph-Based Recommendation** (Dec 2020 - Oct 2021)

  - **This work was accepted by CIKM 2022.**
  - Propose a general reinforcement learning-based meta-path selection framework *RMS*, which is the first framework that can be plugged into any meta-path-based recommendation models.
  - Develop a new meta-path-based recommendation method *RMS-HRec* and design training strategies to fully explore the potential of meta-paths for recommendation tasks.

- **Towards Efficient MaxBRNN Computation for Streaming Updates** (Mar 2020 - Sep 2020)

  - **This work was accepted by ICDE 2021.**
  - Propose a novel problem called *streaming MaxBRNN* in spatial database area, which finds the optimal region to deploy a new service point when both the service points and client points are under continuous updates.
  - Devise an efficient slot partitioning-based algorithm (*SlotP*), which divides the space into equal-sized slots and processes each slot independently. Our experiments show that *SlotP* is 2-3 orders of magnitude faster than state-of-the-art baselines.

- **CheetahVIS: A Visual Analytical System for Large Urban Bus Data.** (Sep 2019 - Jan 2020)
  - **This work was accepted by VLDB 2020.**
  - Built a visual analytical system *CheetahVIS* for efficient massive urban bus data analysis, which builds upon Spark and provides a visual analytical platform for the stakeholders (e.g., city planner, data analysts in bus company) to conduct effective and efficient analytical tasks.

SCHOLARSHIPS AND AWARDS

- Postgraduate Scholarship   2020–2024
- Outstanding Graduate in Department of Computer Science and Engineering   2020
- Outstanding Graduate in Shuli College   2020
- Outstanding UG Teaching Assistant   2019
- Outstanding Students Scholarship   2017–2019
- Outstanding Freshmen Scholarship   2016

TEACHING

- **Teaching Assistant** at The University of Hong Kong   Spring 2021
  The Age of Big Data (CCST9047)
- **Teaching Assistant** at Southern University of Science and technology   Spring 2020
  Operating System (CS302)
- **Teaching Assistant** at Southern University of Science and technology   Fall 2019
  Object Oriented Analysis and Design (CS309)
- **Teaching Assistant** at Southern University of Science and technology   Fall 2018
  Data Structure and Algorithm Analysis (B) (CS203B)

ACADEMIC SERVICE

- **Reviewer / External Reviewer**
  - **AAAI 2022**: AAAI Conference on Artificial Intelligence
  - **ICDE 2022**: IEEE International Conference on Data Engineering
  - **SIGKDD 2021, 2022**: Conference on Knowledge Discovery and Data Mining
  - **CIKM 2021, 2022**: ACM International Conference on Information and Knowledge Management
  - **TKDE 2020, 2021, 2022**: IEEE Transactions on Knowledge and Data Engineering

SKILLS

- **Programming:** Python, Java, C++, SQL
- **Tools:** Pytorch, Numpy, Jupyter

LANGUAGES

- **Mandarin:** Native, **Cantonese:** Proficient
- **English:** Fluent
